CLARK'S DOUBLE ACTION

CUTAWAY HARROW

Best for intensive tillage, because they are the result of years of practical experience, are constructed right and of good material. It has four sets of disc gangs held firmly by the main frame, which forces the rear gang to split the furrows cut by the front discs, cutting every three inches, thoroughly pulverizing the soil, cutting down high and rough places, filling in and leveling hollows, leaving the land level.

Write for special booklet on the soil and intensive tillage. It tells why Clark's Cutaway Harrow is best for general purpose and also many "soil facts," that you should know.
